This is ridiculous! I have XM radio and have had it for more than 18 months and I feel it's the greatest invention since the wheel! I LOVE it! As anyone who loves music already knows AM and FM stations have become bland, dry, and tasteless in the last ten years. XM brings quality and variety back into the mix in an awesome way. And I especially love the XM Traffic and weather station addition. Since I live in the DC area it is especially valuable to have. And it is - in my opinion - far superior to any weather and traffic reporting offered on AM or FM radio. This is crazy to block this service to PAYING MEMBERS of the XM network. Please be sensible about this and allow XM to continue offering the outstanding services they provide.
